

## FLAG ACCESSORIES

### **BFD-04CROSS**

The folding cross base suits all of the DD04 Teardrop & Bali Flag range of displays. The spigot allows 360 degree rotation of the flag pole.

Although not ideal for outdoor situations, a water bag can be placed over the feet to provide extra weight to the base where wind is an issue.

The unit folds away when not used and can be packed back in its carry box and into the pole bag if required.

### **BFD-04SPIKE**

The spike base suits all of the DD04 Teardrop & Bali Flag range of displays. The spike is pushed into the ground to provide a firm support when outdoors and the spigot allows 360 degree rotation of the flag pole.

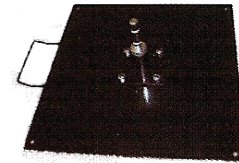

The unit packs away when not used and can be packed into the pole bag if required.

### **BFD-04FLAT**

The flat base suits all of the DD04 Teardrop & Bali Flag range of displays. It can be used both in and outdoors as required using either a Water bag, or pegs into the ground for support in windy conditions.

The spigot allows for 360 degree rotation of the flag pole.

### **BFD-04WATER**

The Water bag can be fitted over either of the Cross or Flat bases and filled with approx 10l of water to provide extra weight for the flag display.
