

# BFD TEARDROP FLAG

BFD Teardrop flags follow the traditional curved teardrop shape that is popular for both outdoor and indoor eye-catching graphics. They can be used to replace existing flags, or purchased with new display hardware.

## Sizes

Teardrop flags are available in 3 sizes that will suit most applications.

Small: 1.98m high (1.55 x 0.76m graphics panel)

Medium: 3.26m high (2.64 x 1.05m graphics panel)

Large: 4.66m high (3.59 x 1.28m graphics panel)

## Single and double sided

All Teardrop flags are printed using a digital sublimation process that ensures rich & vibrant colour reproduction with a long life-span.

Single sided (mirrored) flags are printed to the flag textile with a direct sublimation process that produces a full image strike-through (95%+) mirror to the reverse.

Double sided flags are printed as 2 images using a transfer sublimation process, before being bonded together with a blockout sandwich in-between.

## Display hardware and accessories

A wide range of display hardware and accessories are available to suit the Teardrop flags.

### Teardrop flags

#### TEAR-SML

Small teardrop flag, mirrored textile print. Display area = 1.55 x 0.76m.
