

# BFD X-DISPLAY BANNERS

The BFD X-Display banner systems are one of the most portable and economical banner display systems available. The display is fitted with a durable full-colour digital sublimation textile print that will NOT curl at the edges, tear or fade with use. If the panel becomes dirty, simply machine wash and iron the panel ready for use again. All units are supplied complete with a soft carry bag to store both the folded display stand and the printed panel in one unit.

## Blockout print option

The "B" models all use a special blockout media for the print that blocks 99.8% of light making it perfect for applications that have high ambient lighting conditions such as outdoors.

- \* Re enforced poles
- \* Light weight
- \* Soft carry bag
- \* NO minimum order quantities
- \* Curl-free sublimation textile print

Other sizes and styles are also available to suit almost any application. BFD products are printed and assembled in Australia so our production times are FAST! Most BFD products are available with NO minimum order quantities.
